

Softswim C Gallon

Brand: Bioguard

Product Code: 22851BIO

Availability: In Stock

Weight: 0.00oz

Dimensions: 0.00ft x 0.00ft x 0.00ft

Price: \$19.99

Description

1 Gallon - Softswim C

What does it do

SoftSwim[®] C Clarifier is a unique, patented formulation for use in the BioGuard[®] SoftSwim[®] A, B, C Program which includes SoftSwim[®] A Algicide and SoftSwim B. Regular use of SoftSwim C[®] keeps water clear and sparkling.

Features

- 27.5% Hydrogen Peroxide
- pH 3.0
- Patented ClearGuard stabilizer
- Compatible with SoftSwim[®] and other biguanide systems
- Do not use in chlorine, bromine, Mineral Springs[®] or saltwater systems
- Powerful oxidizer

Benefits

- Enhances water clarity
- Effectively oxidizes organic waste

Directions for Use

Directions for Use

Initial Treatment

1. Before opening your pool for the season, take a sample of your pool water to your BioGuard[®] Dealer for a complete water analysis.
2. Once your pool water has been properly balanced, add SoftSwim[®] Algicide A according to label directions.
3. Add one gallon of improved SoftSwim[®] C Clarifier per 10,000 gallons of pool water. Allow the water to circulate for 24 hours.
4. Then adjust the SoftSwim[®] B to 50 ppm. Resume routine maintenance as instructed by the SoftSwim[®] Pool Care Guide.

Routine Maintenance

1. Once each month, add SoftSwim[®] C Clarifier at a rate of one gallon per 10,000 gallons of pool water to maintain sparkling clear water.
2. With the filter operating, pour SoftSwim[®] C Clarifier directly into the water in several areas around the pool.
3. Allow the treatment to circulate throughout the pool for at least 30 minutes before swimming.

NOTE: Excessive rain, high temperatures or heavy bather loads may require more frequent additions of SoftSwim[®] C Clarifier.
