Description

This product is a specially formulated oil-free silicone compound which is very effective in eliminating foam typically caused by soap, shampoo, cleanser and other residues in spas, hot tubs and decorative fountains. It will not affect the water balance and is compatible with other water treatment chemicals.

Directions:

SHAKE WELL BEFORE USING. To prevent foaming, apply one squirt of this product daily with pump in operation. If foam has already developed, apply 2 - 3 squirts of this product to the foaming area while the spa or hot tub is in operation. Repeat as necessary.
