Dimensions: 0.00ft x 0.00ft x 0.00ft

Price: ~~$131.99~~ $112.19

Description
Thickness: 8 mil

3 Year Warranty

For best results: Keep the solar cover off the pool on hot, sunny days. Then trap that heat in the pool over the night time with the solar cover. The solar cover should be placed with the bubble side down.

While solar covers are still the most effective way to trap heat in your pool. They also cut down on water evaporation which keeps you from having to top off the pool as often and keeping atmospheric debris like dust, dirt and other contaminants from entering the water.
